Previous studies have shown that consumption of a source of omega-3 fatty acids (FA) may improve measures of lipid metabolism. This study investigated the effects of a blend of unrefined triacylglycerol (TAG) and omega-3 FA (fish oil, gamma-linolenic acid) and a blend of sunflower seed oil (SFO) and omega-3 FA (alpha-linolenic acid) on plasma lipid concentrations and lipoprotein particle size in healthy women. Twenty-nine overweight (25.2 +/- 3.1 kg/m²) women were randomized to consume (1) omega-3 FA-enriched TAG emulsion, (2) omega-3 FA-enriched SFO, (3) TAG emulsion + saturated FA-enriched SFO, or (4) omega-3 FA-enriched SFO + saturated FA-enriched SFO for 12 weeks. Biochemical variables were measured at baseline and at 12 weeks. Body weight and waist circumference decreased significantly in all groups, but the decrease was not significantly different between groups. Although both supplements caused a decrease in TAG concentrations, the reductions were significantly greater with the omega-3 FA-enriched SFO + saturated FA-enriched SFO supplement. SFO + saturated FA-enriched SFO also reduced large VLDL-1 particles and large HDL-2 particles, and these changes were significant in the TAG group. Both supplements caused significant reductions in total cholesterol, LDL-C, and apoB, and the reduction in LDL-C was greater with the omega

Use Video in the Digital World When you're creating digital content, videos are your best tools for communicating your ideas and getting your message across. In fact, studies show that when you use video in your marketing campaigns, you can boost your ROI by as much as 20 times. Of course, you're not limited to shooting your video on a smartphone and uploading it to YouTube. With today's sophisticated tools, you can record your video right on your PC using a webcam and a free online tool. The great news is that you don't have to be a master of video to use video in your marketing. Most graphics software programs can create still images from a video, like a picture of your wedding day or the coffee mug you're drinking. They can even make a video clip from a series of still images. To view and edit the video you recorded, you need only a Web browser with Flash Player. Check out what Adobe calls the "fastest, easiest, and most powerful online video editor." The video tools let you add any still image or video clip to your video. You can add a title, tag, and even create a user-defined slide show to create a professionally-looking video. As with other aspects of the Adobe creative suite, video editing is made easy for new users by using templates. You can edit your video using either the default templates or your own custom template. From there, you can add effects and transitions to spice up your video and even add your logo. You can share your video online using YouTube,
