CopyShell is a simple and easy-to-use application that add a context menu option in order to copy the full path of the file you have selected into the clipboard. Since it seamlessly integrates within Explorer, creating a new shell extension, you have the possibility to copy the path by accessing the proper option instantly. [How to use] Right-click any file or folder (also in Explorer) and choose "Copy to Clipboard" from the context menu. After a while, you'll have a new option called "Copy path to clipboard" (and "Copy Full path to clipboard") as shown in the images. Just select it and copy the path of the file or folder into the clipboard. This can be used to paste that path into any system in which you have a shortcut or link to that file or folder. A must-have tool for file managers and Windows enthusiasts. [Note] This tool only works with files and folders that are in your current working directory. If that's the case, you can configure the working directory in the Options tab. If you don't know where your current working directory is (for example if you're accessing your data through an encrypted file system), go to the Options tab and click the "Set working directory" button. [System Requirements] You need a file manager (Nautilus, Thunar, and Dolphin are installed by default). CopyShell supports the following file managers: Nautilus, Thunar, and Dolphin. [Changelog] Version 0.3 Added: - Copy shortcut to clipboard. Version 0.2 Updated: - Move files to the working directory. Updated: - Remove file from the working directory. Updated: - Changed save file path. Updated: - Bug fixes and corrections.
