After viewing those 3 app in windows, you can use `microsoft.toolkit.(2.3.8).(office.7.activator).exe` to install Office. Use cygwin to get rid of the `microsoft.toolkit.(2.4.3).(windows.8.and.office.2013.activator)`. Sep 2, 2017 Now the steps to install Office 365 trial version, Use to install the trial version and to remove any Office activation leftovers that you had previously. Restart your computer, and then install the trial version, the way the Installer program guides you. It is important to keep in mind that a trial version cannot be re-activated after the trial period. The trial version only supports one user at a time. Sep 12, 2017 Use the same way for 64-bit Windows. The trial version is free for 30 days. If you need a full version, you can purchase Office 365 in the market. . A: Microsoft's Toolkit is a set of tools for dealing with MS Office solutions. The Toolkit does a number of things, some of which are accessible via the GUI as you noted. The Toolkit also contains scripting tools that are used from the command line. One of these scripting tools allows you to uninstall Office. To uninstall an Office 2013 suite-specific solution from your command-line interface, you can use the `Uninstall-OfficeApps.ps1` script. This script is part of the Microsoft Office Developer Tools package (MSDEVTOOLS) on the GitHub site: Since this script is specific to the suite of Office applications currently installed on your computer, its output will depend on what version of Office you're using. For example, run the script from the command line as follows: `>C:\Users\Administrator\Desktop>Uninstall-OfficeApps -Path "C:\Program Files\Microsoft Office\Rootkit Protection`
