Permissions ===== This application is written in a Windows style. The program is written as an Autorun.inf so users can open a program from the Start menu, and it will open the folder of your choice automatically when they start the computer. This feature may not work on some operating systems. Some Windows 2000 and Windows Vista users will get a message box that the program is being executed without a User Account Control (UAC) prompt. These users will be able to open the program, but will not be able to open the folders. Licensing

FastFolder By BB With Key

The program's external program shortcuts are configured to the twelve most frequently used folders. After selecting a folder and pressing Start, the application auto-starts in that folder. While in that folder, the program auto-moves to the next folder. The

application's taskbar icon will move to the desired folder. The FastFolder Toolbars are set up to stay on top of all other windows. There is a single toolbar on the left side of the application window, and two additional toolbars on the bottom of the application window. The two toolbars on the bottom of the application window contain two additional tabs: 'Quick Explorer' and 'Options'. Clicking on either button will display a dialog window. The FastFolder toolbar includes four buttons. The first button is a 'toolbar menu'. Clicking this button opens a dialog window containing a list of the twelve most frequently used folders. The two additional buttons are 'Up' and 'Down'. Clicking on either button will move the application's taskbar icon to the most recently selected folder. The two additional toolbars at the bottom of the application window include five buttons. The first three buttons are all 'dockable' buttons.

They are 'Recents' which displays a dialog window containing a list of the most recently visited folder, 'Favorites' which display a dialog window containing a list of the frequently used folders, and 'More Options' which displays a dialog window with the FastFolder Options. The three dockable buttons at the bottom of the application window include two buttons, and one button is a 'separator'. The 'separator' button separates the toolbars on the right side of the program window. Clicking on the separator button opens a dialog window. The 'Options' button takes you to the FastFolder Options window. The FastFolder Options window allows you to select the application's taskbar icon to remain in the tray, to remain in the system tray, or to appear as a full application window. There are also twelve 'More Options' buttons which will expand the dialog window with the FastFolder Options, and a 'Return to Tray' button. There are also

four icons on the program's taskbar. The four icons are 'Quit', 'Options', 'Update', and 'About'. There are four 'tray menus' in the FastFolder system tray. The tooltips for the four 'tray menus' include the words 'Quit', 'Options', 'Update', and ' b7e8fdf5c8
