You might also want to have a look at Windows 10 Mojave. This particular OS X come equipped with a lot of new security features that Apple added to prevent hackers from getting into users' privacy. If you are a Windows user, you can download the latest version of Windows 10 for free. Otherwise, you have to go through a paid upgrade process. I wish Apple would focus more on security because thats the only way for an OS to succeed. Thatss not all of them, actually. If youre looking for another video player, perhaps the best you can find is the unofficial standalone version of VLC for Mac. The VLC player can be downloaded and installed for free on any OS X and Linux based computer. The version is a little slow, but its still the best media player for OS X and Linux. Three years ago, VLC began its journey from a open source free media player to a powerful tool. What began as a tool for the masses has now grown into one of the most popular media players in the world. They feature can now be downloaded on your Mac and PC, which means that you can use it as a standard media player on any device. VLC is a free open source cross-platform media player and streaming library developed by VideoLAN. The player is cross-platform as well, working on Linux, Windows, macOS, and other operating systems. The goal of VLC is to provide a portable, easy-to-use, and

full-featured solution for playing most multimedia files. Currently, you can get VLC on iOS, Android, and the web, as well as Mac and Windows desktop operating systems. We talk about VLC over and over because it truly is the best media player on any platform. And yes, we realize that it is not just a video player. You can also use VLC to play audio, which is just as great.
