189 Chapter 12: The Bathymetry If you click on the Bathymetry window, you can: Displays the depth isolines. Display the data represented by colours. Display the depth by normal map. At full screen, the isolines can be removed and the depth map shows. When that button is active the isolines are removed, but the depth map is displayed at the bottom of the window. In the Tools menu, you can use the Bathymetry toolbar to: Zoom in and Zoom out. Display the depth isolines by transparent colour. Display the depth isolines in a dark or transparent way. When you click on one of these buttons, a toolbar is displayed above the isolines. You can drag the toolbar to its visible position. You can also click on a button to move it to the extreme left or right. To show the depth map: Click on Bathymetry, and then the button in the bar: Transparent Bathymetry View or Transparent Dark Bathymetry View Use the first button (Transparent Bathymetry View) to change the views mode. Under each of the two views, the depth isolines and the colour wedge are shown. Use the second button (Transparent Dark Bathymetry View) to change the views mode. Under each of the two views, the depth map is shown. You can also enable the bottom display in the Tools menu. The bottom should be displayed when you click on the button in the toolbar. A thick black line connects the depth isolines from the lowest depth to the highest one. It is the bottom of the depth map, and it also is linked to the bottom of the window. The thick black line disappears when you close the depth map. In the Tools menu: Refresh and Clear the depth isolines To refresh the depth isolines, select YES from the toolbar button. To clear them all,

---

select NO. To refresh only this depth isoline, select YES from the toolbar button. To refresh only the blue isolation colour, select YES from the toolbar button. To clear this isolate colour, select NO. To remove the blue colour, select NO from the toolbar button. To remove only a part of the blue colour, select YES from the toolbar button and then drag the left and right side of the window. To remove the whole colour, select NO from the toolbar button. The toolbar buttons are configured the same way. When you change the depth isolines in the depth map view, the toolbar buttons are not updated. You need to click the toolbar button again to change to the other views mode. TurboWin User Manual
